Product Description

Multi-Function OPT Body Shape Professional Hair Removal Diode Laser Machine For Painless Operation

Product Description:

The Energy Density of this Laser Hair Treatment Device can reach up to 120 J/cm², making it one of the most powerful laser hair removal devices on the market. This high energy density allows the laser to penetrate deep into the skin and target the hair follicles for effective removal. The laser type used in this device is Other, which provides a safe and effective treatment for a wide range of skin types.

The Hair Removal Laser Machine is equipped with TEC+Sapphire Contact Cooling, which provides a comfortable and pain-free treatment for clients. The cooling system ensures that the skin is protected from the heat generated by the laser, while also reducing any discomfort during the treatment process.

This Laser Hair Elimination Machine is perfect for use in professional settings such as hair removal clinics and spas. Its powerful laser technology, high energy density, and effective cooling system make it a reliable and efficient hair removal device for clients. The Hair Depilator Machine is also easy to use, with simple controls and a user-friendly interface.

In summary, the Hair Removal Laser Machine is a powerful and reliable device that provides effective hair removal treatments for clients. Its stationary, vertical design, high power output, and advanced cooling system make it an ideal choice for professional hair removal clinics and spas. Whether you are looking for a Hair Depilator Machine for personal or professional use, this Laser Hair Treatment Device is sure to deliver the results you need.

Features:

Product Name: Hair Removal Laser Machine

Style: Stationary, Vertical

Spotsize: 12mm*12mm

Coolingtype: TEC+Sapphire Contact Cooling

Safety Features: Skin Contact Cooling, Automatic Power Cut-off

Machine Power: 1200W

This professional Hair Removal Device is a Laser Hair Treatment Device that features a Stationary, Vertical style. The device has a Spotsize of 12mm*12mm and uses TEC+Sapphire Contact Cooling for a comfortable and safe hair removal experience. It also includes Safety Features such as Skin Contact Cooling and Automatic Power Cut-off for added protection. With a powerful Machine Power of 1200W, this Laser Hair Treatment Device is a must-have for anyone looking for an effective and efficient hair removal solution.
